Core[®]
by La Tavola

la tavola[®]

La Tavola's **Core[®] Buffet Collection** is the new buffet line
designed by **Sergio Sambonet**.

Design, Function, Identity.

La Tavola's products incorporate a keen awareness of ever-changing trends and design styles, whilst making sure to always deliver above operator's expectations in terms of functionality.

Core[®]
by La Tavola

Redefines Breakfast Buffet

The morning ritual becomes celebration of taste and elegance.

Core® transforms the breakfast buffet into a refined experience. Functional, versatile and designed to last, each piece combines practicality and style, setting a new standard in luxury hospitality.

Core®
by La Tavola

The Complete Dining Solution

Discover the **Core®** buffet, designed to showcase an international selection of dishes.

Equipped with hot and cold holding functions, it elegantly presents hot meals, fresh salads, appetizers, and desserts.

Ideal for modern restaurants, hotels, and catering, it combines functionality and design, delivering a complete and high-quality culinary experience.

Core®
by La Tavola

At La Tavola, every material is chosen to elevate both design and performance.

High-Pressure Laminate (HPL) offers strength and resilience with a contemporary edge, while powder-coated finishes bring sleek durability and vibrant character.

Solid surface adds seamless elegance and refined versatility. Alongside these, resin, gres, and PVD enrich the collection with texture, depth, and luminous detail. Together, they embody a philosophy of innovation and style — premium finishes that transform every presentation into an extraordinary experience.

Core[®]
by La Tavola

A complete buffet, anywhere.

Core® brings the full buffet experience to even the smallest spaces. This mobile solution combines elegance and practicality, allowing hotels to create a refined presentation with everything in one compact, versatile cart. Designed to impress, built to adapt.

Market displays

Enhancing buffet presentations with elegant multi-level setups.

Build your ideal Market Display by combining modular elements

Mix and match **Boxes** (with or without boards and covers), **Fresh Crates** and **Stands** to create the setup you need.

Different heights and inclinations of the legs and stackable parts offer full flexibility-whether for visibility, protection, or quick access. Each piece adapts as your service evolves.

And choose the colors and finishes that match your style

Fresh Crates

Crafted from food-safe powder-coated steel, offered in 3 elegant color finishes.

Stands

Made of durable powder-coated structure available in 4 colours.

Market Boxes

Made of HPL, a high-performance and hygienic material, available in 5 distinctive finishes.

Market Boxes

COMBINE THE ELEMENTS AND CREATE A UNIQUE MULTI-LEVEL SET-UP.

3 different heights, 4 colours of the stands and 5 HPL colours for the boxes with their PETG or HPL Covers. The main material used is HPL, a very durable, eco-friendly and hygienic material.

Materials

SOLID SURFACE

Used for riser tops, cake stands, and multi-level displays, solid surface provides a smooth, seamless appearance.

MFC

Warm tones and refined textures create a natural look that enhances any setting.

HPL

Elegant surfaces that blend timeless style with modern design freedom.

POWDER COATED FINISH

A sleek finish with endless possibilities, powder coating brings color, texture, and personality to every project.

TITANIUM COATED FINISH

This finish adds depth, brilliance, and a luxurious touch to every surface.

GRÈS

Grès surfaces combine elegance with versatility, they adapt seamlessly to different concepts and design styles.

RESIN

Resin risers bring lightness and creativity to buffet displays.

HPL

Natural elegance, built to last

A refined surface that combines the look of natural materials with superior technical performance. HPL (High Pressure Laminate) is highly resistant to scratches, heat, and moisture, making it ideal for intensive, everyday use in hospitality settings. Easy to clean, durable, and available in a variety of elegant finishes, it ensures long-lasting beauty with minimal maintenance.

Powder Coated Finish

High resistance, low maintenance

A refined finish that combines aesthetics with high performance. Powder coating is an advanced painting process in which dry pigment is electrostatically applied and cured at high temperatures, creating a strong, uniform, and long-lasting surface. Unlike traditional paint, powder coating resists scratches, moisture, corrosion, and UV exposure, making it the ideal choice for buffet structures and tables subject to intensive daily use. Its smooth, non-porous surface ensures easy cleaning and impeccable hygiene, while a wide range of finishes and textures offers maximum design flexibility.

MFC

Timeless strength

Melamine Faced Chipboard (MFC) is a high-performance material. Its durable melamine surface provides excellent resistance to scratches, moisture, and daily wear, ensuring a long-lasting and attractive appearance even in high-traffic hotel and restaurant environments. The non-porous surface is easy to clean and maintain, supporting high hygiene standards essential in food service areas. MFC panels are available in a wide range of colors, textures, and finishes, allowing for versatile design solutions that match any décor or concept.

Titanium Coated Finish

Luxury that lasts

A titanium-coated finish is created through PVD (Physical Vapor Deposition): a thin metallic film is applied to high quality stainless steel in vacuum, producing a surface that is exceptionally durable, hypoallergenic, and beautifully metallic in appearance. This treatment combines aesthetic refinement with high resistance to wear, corrosion, and abrasion — making it ideal for luxury cutlery used in demanding hospitality contexts.

Solid Surface

Shape hospitality with solid surface solutions

Solid surface materials are an excellent choice for the hospitality, restaurant, and catering industry, combining durability, hygiene, and aesthetics in a single solution. Their seamless and non-porous structure ensures that countertops remain hygienic and easy to maintain. Solid surface guarantees a continuous, elegant look that aligns with the high standards of the HoReCa industry.

Grès

A surface that inspires

Porcelain stoneware is the ideal material for buffet tables in the hospitality and catering sector, combining durability, hygiene, and style. Its dense, non-porous surface resists scratches, stains, and heat, ensuring long-lasting performance even under intensive daily use. Easy to clean and maintain, it guarantees impeccable hygiene in food service environments. Porcelain stoneware allows for the creation of elegant and versatile buffet solutions that meet both functional and aesthetic needs.

Spotlight On Food

Italian design, technology, and manufacturing: La Tavola employs top-notch technologies to manufacture its complete range of high-end products for the HoReCa industry.

Boasting a proud history of supplying the hotel market, our expertise allowed us to gain the requirements of quality, punctuality, and flexibility that our customers demand in order to deliver high-end projects for the most sophisticated venues in the world.

After two decades of serving the Italian market, today La Tavola supplies the most exclusive hotel chains worldwide.

IMPULSE 1

We Are Impulse!

We were founded with a clear and creative objective: to bring beauty, a sense of indulgence and touches of luxury to hospitality, foodservice and retail clients around the world.

We embarked on a journey to create a truly lifestyle-oriented brand that would create special moments, memories and experiences for our clients, capturing a spirit of passion and personality in all that we do. We not only design and manufacture items that make life more rich and colorful; we find creative solutions to help our clients build and extend their brand through the most meaningful product imaginable.

Patents and Proprietary Designs

**All product designs are registered by La Tavola.
Any reproduction or imitation is forbidden by law.**

The following products are covered by international patents and copyrights: Dynamic Built-in Modular System®, Libro®, Foldable Front and Back Bar®, Icona®, Icona Secret®, Symphony Action Station®, Symphony Cart®, Symphony Front and Back Bar®, Amphora Cocktail and Buffet Table®, Seagull Front Bar®, Swift F&B Carts and Table®, Goose Heat Lamp®, Magic Chafer®, Multi-purpose Tops®, Cover Oven Dry Chafer®, Dry Warmer for Induction® and Dry Chafer for Induction®.

LA TAVOLA will not hesitate to take legal action against any infringement of patents or registered designs in order to fully protect its intellectual property.

The purchasing of imitation goods may also have legal implications. Design and technical information shown in this document is subject to copyright and may not be used by other parties without prior written approval from LA TAVOLA.

WARRANTIES

All LA TAVOLA products are guaranteed against any defect of manufacture or material. If, after the manufacturer's inspection, they are found to be defective, they will be repaired or replaced free of charge.

Electrical items and induction-powered items have a 18 months warranty period. After 18 months, La Tavola will ensure limitless availability of spare parts needed as well as consulting and service for repairs.

The warranty does not include damages resulting from misuse, abuse, wear tear or incorrect maintenance.

CARE AND MAINTENANCE

(Sorted by product category/material)

CORE® BUFFET, ACTION STATIONS AND BANQUETING FURNITURE

- » Stainless steel parts: Wash the items with hot water and neutral detergents on a soft cloth (do not use detergent containing chlorine and/or alkaline cleaners). Dry the items thoroughly and store them in a dry place. Never use any type of scraper or steel wool which will scratch the surface of the items. The items must be washed as soon as possible after use to avoid any prolonged contact with food remnants. Do not wash in the dishwasher.
- » PETG elements (transparent covers): Wash the items with water and neutral detergents on a soft cloth (do not use detergent containing chlorine and/or alkaline cleaners). Never use any type of scraper or steel wool which will scratch the surface of the items. Do not wash in the dishwasher.
- » High Pressure Laminates (HPL): wash HPL items with water and neutral detergents on a soft cloth. Never use any type of scraper or steel wool which will scratch the surface of the items. Do not wash in the dishwasher.
- » Organic & Mineral Risers: Ecoresin, like all thermoplastic resin materials, should be cleaned periodically a regular, seasonal cleaning program will dramatically help prevent noticeable weathering and dirt build up. Rinse the sheets with lukewarm water (be careful not to expose edges of organic or fabric interlayers to water) remove dust and dirt from the risers with a soft cloth or sponge and a solution of mild soap and/or liquid detergent in water. Rinse thoroughly with lukewarm water. Never use scrapers or squeegees. Keep edges dry and free of liquids. Do not rub with a dry cloth. Because the materials used are organic in nature (i.e. leaves, branches and twigs) it is natural for them to alter slightly in appearance over time. Natural materials are also subject to inherent inconsistency in color, texture and shape. Slight delamination on saw cut edges is also to be expected.

FLATWARE

- » Stainless steel: Wash the items in hot water and neutral washing detergent after each use. Do not use detergents containing chlorine and/or alkali cleaners, then dry thoroughly the items and store them in a dry room. Never use any type of scraper or steel wool which will scratch the surface of the items. Any food remains should be thoroughly cleaned up. The items must be washed as soon as possible after use. When washing in a dishwasher of make sure that at the end of the cycle the items come out perfectly dry otherwise wipe them thoroughly by hand. The above recommendations are particularly meant for the care of the blades, which are made of Aisi 420 stainless steel. This type of stainless steel is the most suitable to ensure a long-lasting cutting edge to the blades, but it is less resistant to the corrosion than the 18-10 (Aisi 304) stainless steel type, which is used to manufacture the forks, the spoons and the handles of the hollow handle knives.
- » Silver-plated: The same maintenance instructions of the stainless-steel ware apply. The silver coating can oxidize due to the contact with certain types of food and in very humid climates. This process is not a defect and it is not a sign of damage, but it is a natural characteristic which only alters the color of the surface, initially to yellowish and eventually to brown. Oxidation can be quickly removed with a common silver polishing product, either in form of paste or of liquid solution. In the latter case, it must be taken the precaution of avoiding a prolonged contact of the solution with the stainless-steel blades as they could be affected by corrosion. The items must be removed from the dishwasher as soon as the cycle is completed and wiped dry with a soft cloth, even if they seem dry. The period of time that the items are exposed to hot steam and the hydrochloric acidity created within the dishwasher, therefore items should be removed as soon as possible from the dishwasher after the end of the washing cycle.
- » PVD and Titanium Coated: In case of appearance of dark spots (caused by organic substances and/or calcium deposits due to an inadequate washing /drying cycle), remove them by simply wiping off the surfaces with a soft cloth soaked with lemon soap or vinegar. If the lemon soap or the vinegar are not sufficient to remove particularly resistant spots, then (and only in that case) use a soft cloth soaked with a liquid metal polisher. We recommend using "Sidel" by Henkel, but most probably any kind of liquid metal polisher is as good as "Sidel". Avoid polishing the surfaces with abrasive cloth or metal polishing paste. Never use scrubbing sponges. PVD coated flatware does not tarnish, and does not require any special maintenance otherwise. In order to delay as much as possible the incurrence of visible wear and tear, handle with as much care as possible during the washing cycle. Wash and store the knives separately from the forks and the spoon.

CERTIFICATION

La Tavola is proud to announce that have obtained the ISO 9001:2015 certification.

Our company has always adhered to these principles:

- » Making quality its priority
- » Exceed customer expectations
- » Creating and nurturing a team of excellent people
- » Considering customers as the company's most important asset

In order to achieve these goals and aim for constant, long-term improvement, La Tavola has decided to challenge ourselves and embark on the path towards ISO 9001:2015 certification.

ISO 9001 certification is a worldwide standard that establishes the requirements for a solid Quality Management System. It details the specific processes, procedures and activities that organisations must create, implement, maintain and improve to successfully manage the manufacture of products or delivery of services.

ISO 9001:2015 specifies the requirements for a quality management system when an organisation:

Must demonstrate its ability to consistently provide products and services that satisfy customers and applicable regulatory and legal requirements,

Aims to improve customer satisfaction through effective implementation of the system, including system improvement processes and ensuring compliance with customer and applicable regulatory and legal requirements.

La Tavola has successfully demonstrated its eligibility for certification and is committed to continuous improvement of its products and services to achieve maximum customer satisfaction.
